

# Example flipchart page taken from 'Les Vingt Bonbons'

*Task objective: to practise recognition and pronunciation of numbers 1 - 10.*

*1. Pupils are divided into two teams, A and B. Each team takes it in turn to cross their player over the river via the stepping stones. In order to move to the next stone, the team must say the number correctly.*

*2. To make it competitive, you can use the timer, which is operated by clicking with the Marquee Select Tool on the fish. Compare the times that each team takes to cross their player over the river.*

*The game can be replayed either by the teams having to cross their players back again, or by swapping sides, so that each team is doing a different set of numbers.*
